Item [54], Title, should read -- **METHOD OF ANALYZING MULTIPLE SAMPLES SIMULTANEOUSLY BY DETECTING ABSORPTION AND SYSTEMS FOR USE IN SUCH A METHOD --**

Item [57], **ABSTRACT.**

Beginning line 15, should read -- amount of the absorbing species in the sample. Also provided by the present invention is a system for use in the above method. The system comprises: (i) a light source comprising or consisting essentially of at least one wavelength of light, the absorption of which is to be detected, (ii) a planar array of multiple containers, and (iii) a detection means that is in line with the light source and is positioned in line with and parallel to the planar array of multiple containers at a distance of at least about 10 times a cross-sectional distance of a container.

Column 41.

Line 42, should read -- containers, --

Line 47, should read -- measuring the amount of absorption of light detected in (iii) --

Line 56, should read -- about 10 times the diameter of a capillary tube. --

Column 42.

Line 8, should read -- 13. The method of claim 1, wherein said planar array --
